

**TFT Monitor for the  
WINCOR NIXDORF ProCash-Line 10.4"**

**Series: TFT-10-GAA**

This monitor is in standard type and in transfective panel version available.

The transfective monitor is based on the newest state-of-the-art technology in the market. This solution offers a reflector that is behind the real LCD segment, which reflects the complete incoming light from the front side.

The reflecting brightness from inside depends on the brightness from outside. Higher sunlight – better clearness of the display!

**This display technology is an absolute alternative to the sunlight monitors, with following additional assets:**

- Ø low power usage (normal background lighting)
- Ø no automatic control of the background lighting necessary
- Ø longer life cycle
- Ø lower pricing because of lower technical investments

**Available for following units:**

- Ø ProCash 456
- Ø ProCash 2156
- Ø ProCash Compact
- Ø ProCash Deposit CDT
